

# Dura-SAM

## (Stand Alone Module)

- Simple yet Rugged Modular Design
- Quick and Easy to Assemble
- Provides Maximum Space Utilization & Flexibility
- The Most Durable, Best Flowing Carton Flow Track in the Industry

Dura-SAM™ (Stand Alone Module) is a Modular Flow Rack Workstation featuring our patented Dura-Flo™ carton flow track system, which packs more features into every carton flow track system for the ultimate in flexibility, durability, & efficiency. Dura-SAM is ideal for the manufacturing industry, particularly on the assembly line, parts picking workstations or anywhere mobile full case or split case picking is needed. Its simple, yet rugged, design is perfect for these most destructive of environments. Save floor space, labor, and increase your picking accuracy with Dura-SAM, *The Next Generation of Carton Flow*.

### Specifications

- Dura-Flo Axles: Heavy duty 5/16" diameter powder coated steel
- Track channel: 18 gauge roll formed steel
- Dura-Flo Wheels: High strength resin 1.9" diameter with 1.125" wide flow surface, lubricious compound wheel
- Frames: 1.5" x 1.5" 14 gauge galvanized square tube
- High strength swivel casters

# DURA-FLO™ The Next Generation of Carton Flow

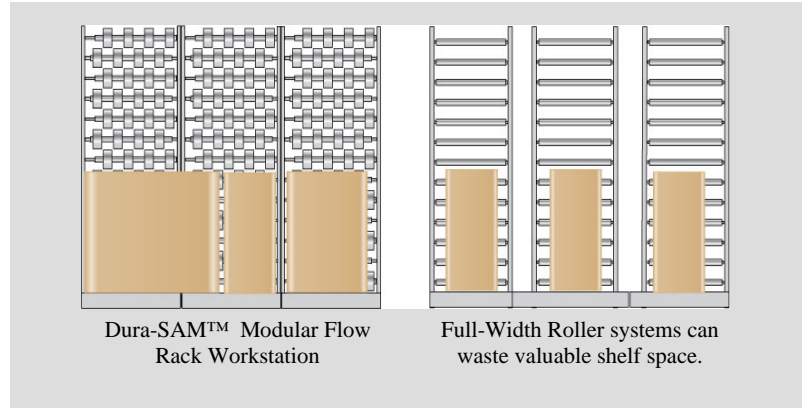

**Dura-Flo™ tracks provides 90% space utilization and 100% flexibility.**

- Fit more cartons in less space!
- Change shelf inventory instantly without changing system components.
- Dura-Flo™ full bed of wheels creates a deck for any mix of package widths & configurations on the same shelf maximizing space & efficiency.

### Benefits

- Increased Efficiency
- Superior Flow
- 100% Flexibility
- Maximum Space Utilization
- Reduced Labor Costs
- Ergonomic
- Maintenance Free

\*Dura-Flo™ patent pending, Dura-SAM™ patent pending

No tools required to replace wheel assemblies. Axles snap into place for quick changes.

Pre-assembled, drop-in tracks retrofit into existing rack for simplified installation.

Dura-SAM™ utilizes our patented FreeWheeler™ technology for easy flow & durable service.

High strength swivel casters with foot locks provide quick transport of packages in any direction.

Frame work connected with CSS exclusive connector brackets.
